

# Long 4L80E Servo Pin

Don't Mix these Two

Wide Band with Short Pin or vice versa

### TIPS TO REMEMBER:

1. The new 1.25 wide high energy band will retrofit back using the longer pin.
2. Do NOT use the two short pins with the wide band!
3. Make sure to match the correct pin with the band if you are replacing or changing the band.
4. Take careful notice of the two band anchors. The wide band anchor is squeezed together more and therefore requires a longer pin.
5. Pins can only be purchased as a kit (pin, piston, spring & seal):  
Long Pin Kit OE # 24223081 Short Pin Kit OE# 24200418
