POWERTRAIN

Our commitment to quality manufacturing and product diversity is unsurpassed. Raybestos Powertrain is dedicated to the highest level of service and products.

AAA Transmission owner Don Stone says, “I trust the GPX Friction Plates for a Honda transmission rebuild more than the OE friction. Not only does it run cooler, but it works identical to the OE friction with no shift, shudder or builder complaints, and at a savings in cost. I’m very happy with the new GPX Frictions.”
